## FIXING TO A SINGLE TRADE VAN RACKING UNIT (PAGE 1 OF 1)

The following page details how to fit the drop down door to a single racking unit. If you are fitting a drop down door to a double racking unit please see page 3. Position the spigots on the fixing brackets into the bottom slots of the drop down door with a nylon washer in between the bracket and the door. Secure the fixing brackets to the side panels using M8x16 coach bolts and M8 flange nuts. **Important - Racking side panels must be positioned with the labels facing as shown below.**

## FIXING TO A DOUBLE TRADE VAN RACKING UNIT (PAGE 1 OF 1)

The following page details how to fit the drop down door to a double racking unit. If you are fitting a drop down door to a single racking unit please see page 2. Position the spigots on the fixing brackets into the bottom slots of the drop down door with a nylon washer in between the bracket and the door. Secure the fixing brackets to the side panels using M8x16 coach bolts and M8 flange nuts. **Important - Racking side panels must be positioned with the labels facing as shown below.**
