

WIRE SHELVING ASSEMBLY INSTRUCTIONS

SHELVES

4PCS

POSTS

4PCS

SHELF COLLARS

16PCS

1

Lay the first shelf flat on the floor

2

Place 2 posts in the 2 holes on one side and lift the shelf up the post to access the first grooves

3

Clip both halves of the shelf collar around both posts and slide the shelf back down so it sits on the collars

4

Repeat steps 2 & 3 for remaining 3 posts

5

Clip another shelf collar on each post in the position where you want the next shelf – ensure they are all level and slide the next shelf over all 4 posts

6

Repeat step 5 with the remaining shelves and adjust the feet on each post to ensure the unit is level

Maximum Shelf Loads UDL
(Uniformly Distributed Load)

Under 1200mm length= 300kg

Over 1200mm length= 240kg

Maximum 1000kg per Unit
