

PRO DECKPLATE ESD ANTI-FATIGUE MAT

The BiGDUG Pro Deckplate Anti-Fatigue Mat is built for tough workspaces, effectively protecting electrical equipment while reducing fatigue from extended periods of standing. The patented structure features a chemical-resistant, anti-slip checker plate pattern vinyl top layer with a high-quality Nitrile foam backing. Anti-fatigue properties promote blood circulation and reduce fatigue when standing for long periods. The anti-static vinyl top surface dissipates static electricity from users, protecting sensitive electrical items from static damage.
