Hi-Vis Yellow

The Best-Selling Upright Protector

Protect your racking uprights and prevent costly damage and repairs

Rack Armour® is the original, innovative upright protector trusted by warehouses worldwide. Made from high-density polymer and fitted in seconds, it outperforms traditional metal guards by absorbing impact energy and deflecting it - preventing damage to the racking, reducing repair costs, and improving overall site safety.

Key Benefits

Innovative design - deflects and absorbs impact energy to keep racking safe

Install in seconds with no fixings, bolts, or floor drilling required

Lifespan of 15+ years - can often be repeatedly hit without replacement

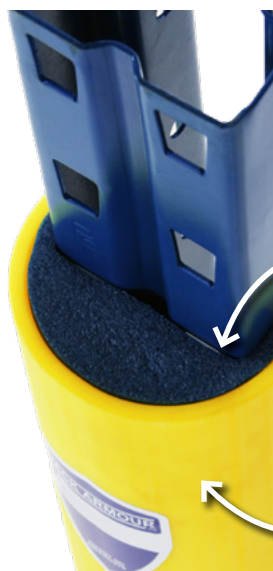

Reduces racking repair bills and downtime caused by upright damage

Functions down to -40°C, and is impervious to moisture, corrosion, and solvents

How Does It Work?

Tested to international safety standards (FEM 10.2.16), Rack Armour® prevents structural damage and reduces the risk of racking collapse.

The foam core

Absorbs energy, dispersing force away from the upright

The outer shell

Deflects the impact

Trusted By...

Rack Armour® is used in thousands of locations across the world, including large and small companies across the logistics, engineering, food and retail sectors.

High Density Polymer

VS

Metal

- | | | | |
|--|---|---|--|
|  | Clips onto racking, no floor fixings required |  | Bolted to the floor or racking |
|  | Absorbs and deflects impact energy, preventing force transfer and minimising damage |  | Transfers impact energy to the floor and/or racking, causing damage |
|  | Can be unclipped or slid up and out of the way for rack inspections |  | Can't easily be removed, which makes rack inspections difficult |
|  | Rarely needs replacing unless repeatedly hit |  | Often requires replacement after one hit, as it dents and/or pulls out floor bolts |

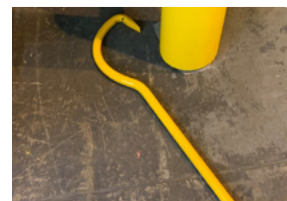

Rack Armour® is made from HDPE polymer, which is fully recyclable at end-of-life

Product SKUs

Ref	Description	Suits...
RAP70	Small (Euro A)	Up to 87mm front facing width
RAP88	Medium (Euro B)	Up to 100mm front facing width
RAP10	Large (Euro C)	Up to 110mm front facing width
RAP111	XL (Euro D)	Up to 120mm front facing width
RAP130	XXL (Euro E)	Up to 135mm front facing width
RAIT/S	Install Hooks	All sizes
RAIT/L	Install Arms	All sizes

Installation Tools

Sold separately

Fitting Hook

Suitable for small to medium sizes.

Simple and effective.

Fitting Arm

Suitable for Large to Extra Large sizes.

Offers better leverage.
