

# Assembly Sheet

## BiG SERIES STEEL SHELF PANEL

**1** The steel panels sit on top of the beams and inside the uprights, leaving a gap at the end of the product.

**2** Slot the single 260mm wide (narrower) panel onto one end of the shelf frame.

**3** Place a 305mm wide panel alongside it.

**4** Continue to add 305mm panels up to the centre support beam.

**5** On certain widths of shelving, it may be necessary to hook one of the panels under the centre support beam, as below.

**6** Continue adding panels to the end of the shelf frame.

**7** Once all panels are placed on the shelf frame, put a spacer at either end to fill the gap.

**BiG340: Requires 2 spacers at each end of the base only**

**BiG400: Requires 2 spacers at each end of every level**

If you have any missing components please take note of the part name and contact your supplier.

Shelving is safe when used responsibly. If in doubt, contact the supplier.
