

Towable Salt Spreader

The forklift towable salt spreader is perfect for towing behind vehicles with standard ball hitch or towing pins. With no electrical or auxiliary valve connection required to the forklift, this mechanically driven salt spreader is simple yet effective and can be used for a wide range of gritting applications. With a large 190 litre capacity hopper and flow control lever, the forklift towable salt spreader will ensure your operations keep moving during the winter months.

- Axle driven requiring no belts, chains or electrical connection
- Large 190 Litre capacity hopper
- Large pneumatic tyres
- Adjustable spread width
- Robust construction
- Towing eye or ball hitch connection
- Flow control lever

<u>Model Ref</u>	<u>Capacity</u>	<u>Hopper Width</u>	<u>Hopper Height</u>	<u>Overall Height</u>	<u>Weight</u>
